

Intro to HTML Reading

🕒 3 minutes

Front-end Development

Front-end development can be split up into three major coding languages.

HTML - HyperText Markup Language defines the structure of a website semantically and the content that will be rendered by the web browser.

CSS - Cascading Stylesheets deal with the presentation of content including aspects such as layout, formatting and colors.

JavaScript - One of the most popular coding languages in the world, brings movement and user interaction to websites.

This Curriculum focuses on the first two cornerstones of modern front-end development: HTML & CSS.

HTML

HyperText Markup Language is made up of HTML Elements denoted using opening and closing tags:
