Semantic HTML Containers

🕐 **2 minutes**

Thinking in boxes

As we continue structuring web pages we should try to maintain a perspective of seeing all of these HTML element building blocks as boxes.

By thinking in boxes and boxes surrounding other boxes we will be able to create more advanced layouts and have an easier time styling our layouts in the future with Cascading Style Sheets.

So how do we step into this mindset of seeing the web in boxes?

Practice.

Front-end development is more of an art than a science. There are many ways to structure and style a page to achieve the same design, but by maintaining this box perspective we will minimize our efforts.

Containers
